BioHalo

The Biohalogenation Company

>25 billion €

global annual market size

>20.000

known contaminated sites only in Europe

>50 billion €

annual health-related costs only in Europe

PFAS - Forever Chemicals

The world needs PFAS replacements

The BioHalo Team

Core Team

Nicolas Krink
Co-founder & CEO

Mariela Mezzina
Co-founder, CSO & COO

Johann Liebeton
Business Dev

Alberto De Maria
Head of Science

Justine Turlin
R&D Project Associate

Arthur Vancolen
Research Assistant

Chemist
Material Science

Advisory Board

Pablo Nikel
Co-founder & Head of AB

Andreas Worberg
Scaling Advisor

Andreas Heyl
Chemistry Advisor

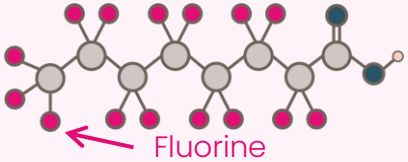
IP Mentor

BioHalo

Fluorine drives our modern society

Per-and polyfluoroalkyl substances -PFAS



>10.000
Known & used PFAS

Impending ban of PFAS in USA & EU

Fluorine adds the high-performance to advanced materials

Chemical resistance

Heat tolerance

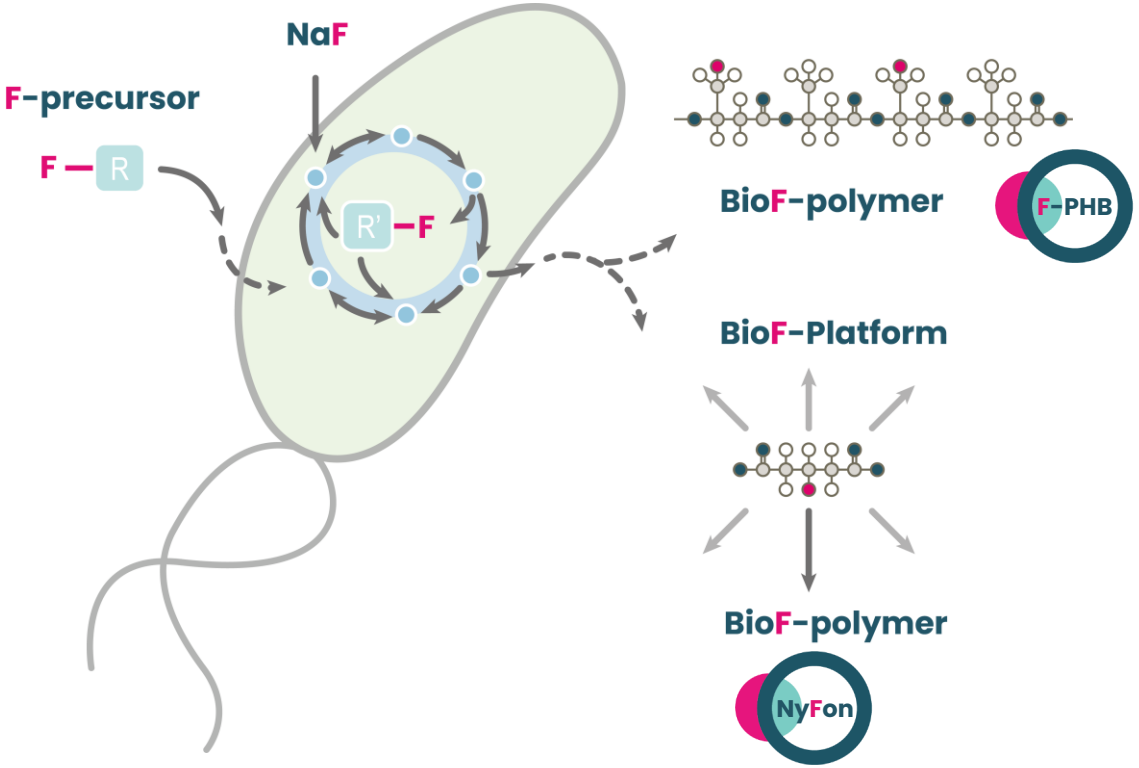
Moisture repellency

Electrical insulation

PFAS-using industries

BioHalo

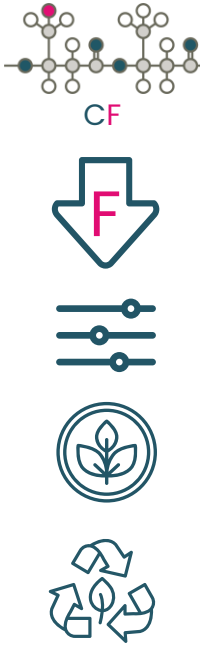
We incorporate fluorine in biopolymers



Our patented biofluorination technology

- Low energy needs
- Renewable & waste as feedstock
- 60% reduced GHG emissions
- Low pollutant generation
- Minimal by-products
- Controlled mono fluorination

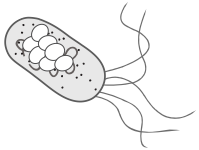
Our biofluorinated polymers



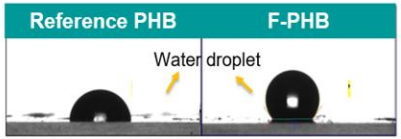
BioHalo

We produce unmatched new-to-market products

Our engineered bacteria



PFAS-like properties



F-PHB

F-PHB	Fluorinated type of polyhydroxyalkanoate (PHA)	Biodegradable polyester

---

F-PHB

Biosynthesis

Fermentation-based F-PHB production

Polymer extraction from biomass

Polymer precipitation

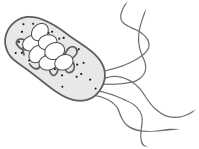
Polymer drying

Final F-PHB product

BioHalo

We produce unmatched new-to-market products

Our engineered bacteria



Novel F-monomer

NyFon

NyFon	Swiss-army-knife commodity	Recyclable F-polyamide

NyFon

Biosynthesis

Chemical synthesis

Fermentation-based 2FMA production

DSP

BioF-platform

F-monomer

Novel product NyFon
